

SIDE is ready for any challenge and we are now also ready to blow Polypropylene preforms.

A new generation of bottles has arrived, showcasing the versatility of the plastics industry. SIDE machines are the perfect choice for PP bottle production. The flexibility and quality of our machines allows our customers across the globe to manufacture the most consistent product.

All the reliability and economical advantage of SIDE PET Reheat Stretch Blow molding process now available for PP preforms.

Now is your opportunity to save time and money by producing your own PP bottles using the easiest and fastest machinery on the market.

Our machines are the perfect choice for applications like bleach, BPA FREE baby bottles, dairy containers and more.
